### About This Directory

This directory was created to aid in locating commercially available sources of buffalograss seed, plugs and sod in and around the central and southern Great Plains region. Although the information presented in this directory was current at publication time, cultivar availability is subject to change. Retail nursery operations not regularly stocking buffalograss products were not included in this directory. In addition to locating sources in this directory, consumers are encouraged to contact their local retail center to determine product availability.

Information presented herein was gathered during July 2010. Buffalograss sod, plug or seed producers or other business entities specializing in the production or sale of buffalograss who are not listed in this directory and who wish to be included in the next update should direct their request to: Dennis Martin, Oklahoma State University, 358 Agricultural Hall, Stillwater, OK 74078, phone:405.744.5419 or [dennis.martin@okstate.edu](mailto:dennis.martin@okstate.edu).

### How to Use This Directory

**Step 1:** In order to locate sources that carry buffalograss, one must first determine cultivar(s) or blend(s) name(s) to search for sources. Choose the cultivar or blend names (listed in alphabetical order) in the left hand column of

Table 1. The cultivar type, whether originating from seed or from a vegetative source, is listed in the second column of Table 1. Vegetative cultivars are only available as sod or plugs. Some seeded cultivars may be available as sod, but rarely.

**Step 2:** Reference the enterprise name producing or distributing the product in the far right hand column of Table 1. Shown in parentheses following the enterprise name is the specific product form, either seed, sod or plugs. The enterprise location, designated by a two letter state code, is shown in the far right hand column. Note that some cultivars may no longer be commercially available and could not be found at this writing.

**Step 3:** After locating the name of a supplier, find the contact information for the supplier in Table 2 (listed in alphabetical order).

**Step 4:** Questions concerning current product availability, price, shipping, installation as well as other specific information should be directed to the commercial supplier. Information on cultivar performance, establishment and maintenance can be found in Extension Fact Sheets HLA-6418: *Selecting A Lawn Grass In Oklahoma*, HLA-6419: *Establishing A Lawn In Oklahoma* and HLA-6420: *Lawn Management In Oklahoma*.

Oklahoma State University, in compliance with Title VI and VII of the Civil Rights Act of 1964, Executive Order 11246 as amended, Title IX of the Education Amendments of 1972, Americans with Disabilities Act of 1990, and other federal laws and regulations, does not discriminate on the basis of race, color, national origin, gender, age, religion, disability, or status as a veteran in any of its policies, practices, or procedures. This includes but is not limited to admissions, employment, financial aid, and educational services.

Issued in furtherance of Cooperative Extension work, acts of May 8 and June 30, 1914, in cooperation with the U.S. Department of Agriculture, Robert E. Whitson, Director of Cooperative Extension Service, Oklahoma State University, Stillwater, Oklahoma. This publication is printed and issued by Oklahoma State University as authorized by the Vice President, Dean, and Director of the Division of Agricultural Sciences and Natural Resources and has been prepared and distributed at a cost of 20 cents per copy. 0810 GH
